INDEPENDENT AUDITOR'S REPORT
(A free translation from the original in Spanish)

Concepción, March 9, 2026

To the Shareholders and Directors
DB Terra Chile Holdco SpA.

Opinion

We have audited the consolidated financial statements of DB Terra Chile Holdco SpA. and its subsidiaries (the Group), which comprise the consolidated statement of financial position as of December 31, 2025, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of December 31, 2025, its consolidated financial performance and its consolidated cash flows for the year then ended, in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards").

Basis for Opinion

We conducted our audit in accordance with Generally Accepted Auditing Standards in Chile. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report.

We are independent of the Group in accordance with the Code of Ethics of the Chilean Accountants' Association, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Generally Accepted Auditing Standards in Chile will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Generally Accepted Auditing Standards in Chile, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Concepción, March 9, 2026
DB Terra Chile Holdco SpA.

3

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group, as a basis for forming our opinion on the consolidated financial statements. We are responsible for the direction, supervision, and review of the audit work performed for the purpose of the group audit. We are solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matters

The Chilean Accountants' Association approved that the Generally Accepted Auditing Standards in Chile fully and unreservedly adopt the International Auditing Standards issued by the International Auditing and Assurance Standards Board for audits of financial statements prepared for the year beginning on or after January 1, 2025.

Concepción, March 9, 2026
DB Terra Chile Holdco SpA.

4

The audit of the consolidated financial statements of DB Terra Chile Holdco SpA. and subsidiaries as of December 31, 2024 and 2023 was carried out in accordance with the Generally Accepted Auditing Standards in Chile in force as of that date. We issued an opinion on these consolidated financial statements without modification dated March 17, 2025 and April 10, 2024, respectively.

DB TERRA CHILE HOLDCO SPA AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

As of December 31, 2025 and 2024

NOTE 1 - GENERAL INFORMATION

DB Terra Chile Holdco SpA., Tax ID No. 77.494.541-5, is a Company, incorporated as a joint stock company by public deed dated November 24, 2021, subscribed before Mr. Patricio Raby Benavente, notary public of the fifth notary office of Santiago. The Company's purpose is, directly or through its subsidiaries or related companies, in Chile or abroad, to invest in tangible and intangible movable assets, shares of corporations or stock companies, rights in other companies, bonds, commercial papers, and other marketable securities; to manage, transfer, operate, and receive income from them; and, in general, to perform all kinds of acts and enter into all contracts necessary to fulfill the Company's purpose or carry out its business activities, including undertaking all related or conducive activities or other businesses related to the Company's line of business.

a) On September 26, 2019, Pacífico Red SpA. acquired all the shares of Pacífico Cable SpA. from Nueva Inversiones Lago Esmeralda Limitada. On the same date, Pacífico Cable SpA. terminated the debt agreement it had with Homestead Capital Solutions LLC, in which Pacífico Red SpA., who was the sole shareholder of the Company, pays the full principal amount of the debt together with all accrued interest.

b) On March 5, 2021, it was agreed to merge the companies Pacífico Cable SpA and Pacífico Red SpA into a single entity, with Pacífico Cable SpA absorbing Pacífico Red SpA. Pacífico Red SpA transferred all its assets and liabilities to Pacífico Cable SpA, and Pacífico Cable SpA succeeded Pacífico Red SpA in all of its rights and obligations. As a result of the merger, Pacífico Red SpA was dissolved without liquidation.

At the merger date, the equity of Pacífico Red SpA. amounted to ThCh\$ 146,352,340, while that of Pacífico Cable SpA. amounted to ThCh\$ 20,701,742. Therefore, and considering that Pacífico Red SpA. held 100% ownership of Pacífico Cable SpA. at the time of the merger, the increase in equity of the continuing entity (Pacífico Cable SpA.) resulting from the merger amounts to ThCh\$ 125,650,598. Following the aforementioned merger, the goodwill recorded by Pacífico Red SpA. for the acquisition of Pacífico Cable SpA. amounts to ThCh\$ 81,462,673, which was allocated to the assets and liabilities of the surviving entity, Pacífico Cable SpA.

c) On December 28, 2021, DB Terra Chile Holdco SpA. acquired all the shares of Pacífico Cable SpA. As of the acquisition date, DB Terra Chile Holdco SpA. increased the Company's capital by Ch\$ 31,328,634,382 through the issuance of 3,132,863 common shares, which were fully subscribed and paid.

The Company's address is Avenida Alonso de Córdoba 3788, piso 6, Vitacura district, Santiago, Chile.

DB Terra Chile Holdco SpA is the direct parent company of Pacífico Cable SpA (Tax ID No. 96.722.400-6), of which it owns 100% of its shareholding. In turn, Pacífico Cable SpA is the direct parent company of Neoconex Fibra SpA (incorporated on 04/23/2025), with 100% ownership interest. As a result, both subsidiaries are fully consolidated in the consolidated financial statements of DB Terra Chile Holdco SpA.

During the 2025 period, transactions were carried out between both entities under market conditions, which include intercompany loans and services provided. These are reflected in assets and liabilities with related parties and are disclosed in the note "Balances and transactions with related parties" (see note 14).

All transactions have been eliminated in the consolidation process of DB Terra Chile Holdco SpA's financial statements, in accordance with applicable IFRS standards.

NOTE 2 - BASIS OF PRESENTATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

2.1) Accounting policies

The consolidated financial statements for the years ended December 31, 2025 and 2024 have been prepared in accordance with the International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB).

The statements of income, cash flows, and changes in equity are presented for the periods from January 1 to December 31 of 2025, 2024, and 2023, respectively.

2.2) Basis of consolidation

- The Consolidated Financial Statements comprise the financial statements of DB Terra Chile Holdco SpA (parent) and its direct and indirect subsidiaries: Pacífico Cable SpA (direct, 100%) and Neoconex Fibra SpA (indirect via Pacífico Cable SpA, 100%) as of December 31, 2025 and 2024. The subsidiaries' financial statements are prepared as of the same closing date and for the same periods as the parent company, and the same accounting policies have been consistently applied as in previous years.

The following is the detail of the subsidiaries included in the consolidation:

Tax ID No.	Entity name	Functional currency	Ownership interest					
			12/31/2025			12/31/2024		
			Direct	Indirect	Total	Direct	Indirect	Total
96.722.400-6	Pacífico Cable SpA.	Chilean pesos	100%	-	100%	100%	-	100%
78.079.629-4	Neoconex Fibra SpA.	Chilean pesos	-	100%	100%	-	100%	100%

Pacífico Cable SpA. is domiciled at Tucapel 2827, Valle Paicaví, Concepción - Chile.

Pacífico Cable SpA ("Mundo") offers the following products:

- Broadband Internet: Plans ranging from 600 to 10,000 Mbps FTTH, including home Wi-Fi. Mundo stands out for being one of the first operators to deliver 1,000, 2,000, 5,000, and 10,000 Mbps at home internet and with FTTH technology. Additionally, it has been recognized by NPERF and OOKLA as the fastest broadband provider in the country and in Latin America, the latter for the fourth consecutive year (2025).
- HD Digital Television: 180 digital channels.
- IP Telephony: Unlimited telephone plans to the entire country. At the national level, Mundo's management stands out as the first IP telephony operator in Chile, with plans for minutes to fixed and mobile networks.
- Mobile Telephony: Pacífico Cable SpA launched this service in 2021. Mundo Móvil offers plans ranging from 700 minutes to unlimited minutes, with internet data packages from 30 GB up to unlimited data.

Neoconex Fibra SpA is a consolidated subsidiary under Pacífico Cable SpA, which owns 100% of its shares. It was incorporated on April 23, 2025, and its main purpose is to provide telecommunications services (internet, telephony, and networks) aligned with Pacífico Cable SpA and contributing to the group's operations.

During 2025, Mundo incorporated an additional 6.4% of households into its commercial operation (as of 12/31/2025), compared to 6.4% in 2024. At year-end, it had an installed network covering more than 4,483,000 (12-31-2025) potential households (PH) to offer its services. In 2025, over 284,000 new PH were added to commercial operation (12-31-2025), compared to approximately 253,000 PH added in 2024.

Currently, Mundo's network coverage is 100% FTTH (Fiber to the home) technology, a technology suitable for providing services of the highest quality, being Pacífico Cable one of the pioneers in the development of FTTH in Chile. As a result, the company currently owns a fiber network exceeding 76,000 kilometers, with 79% allocated to the last-mile network and 21% to the backbone network.

As of the end of 2025, Mundo reported residential customer growth exceeding 8.6% (12-31-2025), compared to 9.2% in 2024. By year-end, the number of residential customers reached over 1,041,000 (12-31-2025), compared to 959,000 in 2024. Its presence extends to 14 regions across the country, serving 270 communes, with more than 120 owned branches.

Likewise, during 2025, Mundo's turnover grew by 10%, reaching an annual figure of ThCh\$ 229,763,351, compared to ThCh\$ 208,924,000 in 2024.

Mundo's contribution to the institutions and its actions to contribute to the development of distance education stands out, making Mundo a company that is close to and valued by the community. In this regard, the following milestones can be highlighted:

- 14 regions and 270 communes of the country which already have the connectivity of Mundo.
- Mundo is the fastest growing company according to the latest report of the Chilean Undersecretary of Telecommunications "Subtel". As of September 30, 2025, the Company holds a market share of 20.8% in the broadband internet segment, compared to 19.6% as of December 31, 2024.

In September 2025, Mundo Telecomunicaciones launched the first 50G fiber optic network in Latin America, marking a milestone that positions Chile as a digital leader in the region. This technology multiplies data transmission capacity and opens new business opportunities with companies and public services.

By multiplying data transmission capacity, it paves the way to advancements in key sectors such as digital health, with smoother telemedicine and real-time diagnostics; distance education, with more stable online classes and improved audiovisual quality; online public services, with faster and more secure procedures for citizens; and industry, with more efficient production processes thanks to hyperconnectivity, among others.

At the same time, new solutions were presented that will improve the daily lives of individuals and businesses: WiFi 7, offering faster and more stable connections for multiple devices throughout the household; and FTTO (Fiber To The Office), providing direct fiber connections to offices to maintain high-quality connectivity throughout all workspaces.

By the end of 2025, Mundo contributed more than 3,000 free services to various social organizations, institutions and public spaces, including hospitals, mother centers, health centers, neighborhood associations, community unions, shelters, senior citizen centers, sports clubs, police, Investigations Police of Chile (PDI), fire departments and National Forestry Corporation (CONAF), among others.

By 2026, Mundo aims to reach more than 1,000,000 homes with its services. Thus, Mundo consolidates its image as an innovative and approachable company that promotes digital inclusion in Chile, always in line with the company's strategic vision: to be the country's leading telecommunications company and a protagonist in the challenge of narrowing the digital divide in Chile.

By 2025, Mundo has been recognized with high-standard external awards, including the fastest internet in Latin America by consultancies such as Ookla and the Consumer Loyalty Award (ALCO) for the fourth consecutive year as the operator providing the best Internet and TV service. These validations reinforce its governance, transparency, and management capability by demonstrating consistency in operational metrics and user satisfaction. This technical leadership is complemented by an infrastructure transformation focused on sustainability: the incorporation of photovoltaic-powered hubs positions the company as a driver of the energy transition, while the migration to FTTH and investment in resilient and efficient networks consolidate its role as a driver of innovation and infrastructure.

In parallel, Mundo applies circular economy principles, recovering and giving new life to more than 60% of unused equipment. All of this enables and enhances its social impact: over 3,000 free services delivered to hospitals, neighborhood associations, shelters, senior centers, emergency services, and community organizations; more than 1,500 seniors trained in digital skills; and specific programs to strengthen digital inclusion in vulnerable communities.

With the goal of surpassing one million connected households and positioning itself as the operator with the most extensive fiber optic network in the country, Mundo not only improves connectivity but also demonstrates an integrated model where governance, innovation, clean energy, and social responsibility converge to close digital gaps and contribute to the Sustainable Development Goals.

2.3) New standards, interpretations and amendments

a) Standards, interpretations and amendments which are mandatory for the first time for years starting on January 1, 2025.

Amendment to IAS 21 – Lack of exchangeability. Published in August 2023, this amendment affects an entity that has a transaction or operation in a foreign currency that is not convertible into another currency for a specific purpose at the measurement date. A currency is convertible into another currency when it is possible to obtain the other currency (with a normal administrative delay), and the transaction is carried out through a market or convertibility mechanism that creates enforceable rights and obligations. This amendment establishes the guidelines to be followed to determine the exchange rate to be used in situations of absence of convertibility such as the one mentioned above. Early adoption is permitted.

The adoption of the standards, amendments and interpretations described above does not have a material impact on the consolidated financial statements of the Company.

- b) Standards, interpretations and amendments issued, whose adoption is not mandatory yet, for which no early adoption has been made.

Standards and interpretations	Mandatory for years starting on
Amendment to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments. Issued in May 2024, this amendment aims to: • Clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system; • Clarify and add further guidance for assessing whether a financial asset meets the payment of principal and interest only (SPPI) criterion; • Add new disclosures for certain instruments with contractual terms that may change cash flows (such as some instruments with features linked to the achievement of environmental, social and governance (ESG) objectives); • Make updates to the disclosures for equity instruments designated at fair value through other comprehensive income (FVOCI).	01/01/2026
• Annual improvements to IFRS standards – Volume 11. The following improvements were published in July 2024: IFRS 1 First-time adoption of International Financial Reporting Standards. Some cross-references were improved to facilitate the understanding of IFRS 1. • IFRS 7 Financial Instruments: Disclosures. In relation to the disclosures on profit and loss from the derecognition of financial assets where there is continuing involvement, a reference to IFRS 13 is incorporated with the objective of disclosing whether there are material unobservable inputs that impacted the fair value, and therefore, part of the result of the derecognition. • IFRS 9 Financial Instruments. A reference on the initial measurement of accounts receivable was amended by eliminating the concept of transaction price. • IFRS 10 Consolidated Financial Statements. Some improvements are incorporated in the description of the control assessment when there are “de facto agents”. • IAS 7 Statement of Cash Flows. A reference in paragraph 37 regarding the concept of “equity method” was amended by eliminating the reference to the “cost method”.	01/01/2026
Amendment to IFRS 9 and IFRS 7: Contracts that refer to electricity that depends on nature. Published in December 2024. This amendment includes: • Clarifying the application of “own use” requirements; • Allowing hedge accounting if these contracts are used as hedging instruments; and • Disclosure requirements to enable investors to understand the effect of these contracts on an entity's financial performance and cash flows.	01/01/2026

IFRS 18 Presentation and disclosure in financial statements. Published in April 2024. This is the new standard on presentation and disclosure in financial statements with focus on income statement updates. The key new concepts introduced in IFRS 18 relate to: • The structure of the statement of profit or loss; Required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and enhanced principles on aggregation and disaggregation which apply to the main financial statements and notes in general.	01/01/2027
IFRS 19 Subsidiaries that are not of public interest: Disclosures and amendment. Published in May 2024 and amended in August 2025. This new standard and its amendment are applied in conjunction with the requirements of other IFRS Accounting Standards. An eligible subsidiary applies the requirements of other IFRS Accounting Standards, except for the disclosure requirements, and instead applies the reduced disclosure requirements of IFRS 19. The reduced disclosure requirements of IFRS 19 balance the information needs of users of the financial statements of eligible subsidiaries with cost savings for preparers. IFRS 19 is a voluntary standard for eligible subsidiaries. A subsidiary is eligible if: • It does not have public accountability; and • It has an ultimate or intermediate parent that produces consolidated financial statements available for public use that comply with the International Financial Reporting Standards. The amendments to IFRS 19 assist eligible subsidiaries by reducing the disclosure requirements for the Standards and amendments issued between February 2021 and May 2024, specifically: • IFRS 18 Presentation and disclosure in financial statements; • Suppliers' financing agreements (Amendments to IAS 7 and IFRS 7); • International tax reform - Pillar Two model rules (Amendments to IAS 12); • Lack of exchangeability (Amendments to IAS 21); and • Amendments to Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7).	01/01/2027

Amendment to IAS 21 - Translation to a Hyperinflationary Presentation Currency Published in November 2025. These limited-scope amendments specify the translation procedures for an entity whose presentation currency is that of a hyperinflationary economy. The entity applies the amendments if: • Its functional currency is that of a non-hyperinflationary economy and it is translating its results and financial position into the currency of a hyperinflationary economy; or • It is translating into the currency of a hyperinflationary economy the results and financial position of a foreign operation whose functional currency is that of a non-hyperinflationary economy. The amendments will improve the usefulness of the resulting information in a cost-effective manner. Developed in response to stakeholder comments, these amendments are expected to remove diversity in practice and provide a clearer basis for presenting information in a hyperinflationary currency.	01/01/2027
Amendments to Illustrative Examples on IFRS 7, IFRS 18, IAS 1, IAS 8, IAS 36 and IAS 37 - Disclosures about Uncertainties in the Financial Statements. Published in November 2025. These amendments include examples illustrating how an entity may apply the requirements in IFRS Accounting Standards to disclose the effects of uncertainties in its financial statements. These examples do not add to or change the requirements in IFRS Accounting Standards and, therefore, there are no transition requirements. Instead, these examples will accompany the respective IFRS Accounting Standards to which they relate.	01/01/2027

Management is in the process of evaluating the impacts associated with the new accounting pronouncements mandatory for application as of January 1, 2026.

2.4) Responsibility for information and estimates performed

The information contained in these consolidated financial statements is the responsibility of the Management of DB Terra Chile Holdco SpA. and its subsidiaries. The preparation of financial statements in accordance with IFRS requires the use of significant judgments, estimates, and accounting assumptions that affect the amounts recognized for assets and liabilities, as well as the income and expenses reported in each year. These estimates are continuously reviewed and are based on the best information available at the date of issuance of the financial statements. However, actual results may differ from these estimates, and changes are recognized prospectively in accordance with IAS 8.

The main areas of judgment and estimation that may have a material effect on the consolidated financial statements are as follows:

- Impairment in the trade receivables portfolio

The allowance for doubtful accounts is determined by applying the expected credit loss model to trade receivables. Management uses provisioning matrices and internal models that incorporate historical default data, payment behavior of different customer segments, current credit risk conditions, and future macroeconomic projections. The selection of expected loss rates, the delinquency periods considered, and the economic scenarios used require a significant degree of judgment and could result in material changes in the level of provisions due to variations in these assumptions.

- Assessment of possible impairment loss of property plant and equipment

Property, plant and equipment are subjected to impairment tests when there are indications that their carrying amount may not be recoverable. For these purposes, Management estimates the future cash flows expected to be generated from the continued use of the assets and their final disposal, as well as the appropriate discount rate to discount them. These calculations involve significant judgments regarding traffic volumes and network utilization, price levels, operating margins, future capital expenditures, and business-specific risks in the telecommunications sector.

- Fair value of property, plant and equipment related to the fiber optic network

The fiber optic network is measured at fair value in accordance with IFRS 13 (Level 3). Management uses an income approach based on discounted cash flows attributable to these assets, considering significant assumptions about remaining economic useful life, traffic growth and penetration rates, pricing structure, competition levels, operating and maintenance costs, discount rates (WACC), and perpetual growth rates. Changes in these assumptions could result in significant variations in the recognized fair value.

- Useful lives and residual values of property, plant and equipment

Depreciation is calculated based on the estimated economic useful lives and residual values for each asset category, determined by considering technological obsolescence, usage intensity, infrastructure renewal plans, and maintenance conditions. Management reviews these parameters at least annually and adjusts them prospectively when circumstances change.

- Assessment of the recoverability of tax losses

The Company recognizes deferred tax assets on tax losses and deductible temporary differences only when it is probable that sufficient future taxable profits will be available for their utilization. This requires estimating projections of future taxable income, reversal periods of temporary differences, the current regulatory framework, and expected changes in tax rates.

- Assessment of possible impairment of goodwill

Goodwill is subjected to annual impairment tests at the level of cash-generating units (CGUs) using discounted cash flow models. These incorporate key assumptions about revenue growth, customer base evolution, cost structure, investment requirements, terminal growth rates, and WACC consistent with the risk of each CGU.

- Fair value of hedging derivatives

Cross-currency swaps and interest rate swaps are measured at fair value (Level 2) using observable market inputs (SOFR/ICP curves, USD/CLP forwards, implied volatilities). Valuation requires selecting appropriate models (Black-Scholes, discounted cash flows), defining reference curves, incorporating own/counterparty credit risk adjustments, and considering correlations between market factors.

These estimates have been made on the basis of the best information available at the date of issuance of these financial statements. However, it is possible that events that may occur in the future may make it necessary to modify them (upwards or downwards) in future periods, which would be done in accordance with the provisions of IAS 8 on a prospective basis, recognizing the effects of the change in estimate in the corresponding future financial statements.

These consolidated financial statements of DB Terra Chile Holdco SpA. and its subsidiaries as of December 31, 2025 and 2024 have been prepared and comply in all respects with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

NOTE 3 - ACCOUNTING CRITERIA APPLIED

The significant accounting principles applied in the preparation of the financial statements are described below:

3.1) Basis of measurement

In the preparation of these consolidated financial statements, DB Terra Chile Holdco SpA. applies measurement bases for different categories of assets and liabilities. Below are the most significant measurement bases applied by the Group, including historical cost, fair value, and present value, in accordance with the measurement principles established in each specific standard.

<u>Category</u>	<u>Basis of measurement</u>	<u>Treatment under IFRS</u>
Property, plant and equipment (other than fiber optic)	Historical cost	Cost less accumulated depreciation and impairment
Intangible assets (except for goodwill)	Historical cost	Cost less accumulated amortization and impairment
Inventories	Historical cost	Lower of cost and net realizable value.
Rights of use for leases and their liabilities	Present value of remaining installments	Present value of future lease payments
Derivative financial instruments	Fair value	Initial and subsequent recognition at fair value.
Interest-bearing loans	Amortized cost	Initial value less amortization

3.2) Presentation of consolidated financial statements

The consolidated financial statements of the Company as of December 31, 2025 and 2024 for the statements of financial position, and for the years from January 1 to December 31, 2025, 2024, and 2023 for the statements of income, comprehensive income, changes in equity, and cash flows, are as follows:

- a) Consolidated statements of financial position as of December 31, 2025 and 2024.
- b) Consolidated statements of income for the years ended December 31, 2025, 2024 and 2023.
- c) Consolidated statements of comprehensive income for the years ended December 31, 2025, 2024 and 2023.
- e) Consolidated statements of cash flows for the years ended December 31, 2025, 2024 and 2023.
- d) Consolidated statements of changes in equity, for the years ended December 31, 2025, 2024 and 2023.
- f) Explanatory notes to the consolidated financial statements.

3.3) Transactions in foreign currency

a) Presentation currency and functional currency

The transactions included in the Company's consolidated financial statements are valued using the currency of the primary economic environment in which the entity operates (functional currency). The consolidated financial statements of DB Terra Chile Holdco SpA. are presented in Chilean pesos, which is the functional currency and presentation currency of the Company and its subsidiaries.

b) Transactions and balances in currency other than the functional currency

Transactions in a currency other than the functional currency are processed as foreign currency operations and recorded using the exchange rate effective at the date of transaction. Balances of monetary assets and liabilities or indexed units denominated in foreign currencies are valued at the exchange rates prevailing at the end of each year. The variation between the original amount and the closing amount is recorded in income under exchange differences. The differences resulting from the valuation of UF are recognized in the profit or loss for the year under the account income from indexation units.

Assets and liabilities that are required to be presented at their fair value are excepted from the above. These mainly consist of those arising from financial derivative contracts for hedging of cash flows, in which such differences are recognized in equity.

c) Translation basis

Assets and liabilities denominated in currencies other than the functional currency or indexed units are valued in functional currency at the exchange rate in effect, according to the respective parities in effect at the close of each accounting period to be reported.

Assets and liabilities in foreign currency have been translated into Chilean pesos at the exchange rates observed at the year-end as follows:

		12-31-2025	12-31-2024
US dollar	USD	907.13	996.46
Euro	EUR	1,066.58	1,035.28
Yuan	CNY	129.76	135.94
Unidad de fomento	UF	39,727.96	38,416.69

3.4) Cash and cash equivalents

This caption includes cash and cash equivalents, including balances held in cash and bank checking accounts, time deposits in financial institutions, investments in mutual funds and other financial investments (marketable securities easily liquidated), with original maturities of less than 90 days, not subject to restrictions under risk of loss of value. This item also includes investments related to cash management, such as repurchase and resale agreements whose maturity is according to the preceding definition.

Interest and other valuation effects are recognized in the income statement for the corresponding period. Bank overdraft facilities used are included in other current financial liabilities in the statement of financial position.

3.5) Income tax and deferred taxes

The income tax comprises the legal obligations for income tax and deferred taxes, recognized in accordance with IFRS. The income tax is recognized in the income statement, except when it is related to items directly recorded in equity, in which case the deferred tax effect is also recognized in equity. This is:

- i. Income tax obligation: Income tax obligations are recognized in the financial statements based on taxable profits as of their closing date and applying the income tax rate prevailing as of that date.
- ii. Deferred taxes: Deferred taxes are those taxes the Company expects to pay or recover in the future for the temporary differences between the carrying amount of assets and liabilities for the purposes of financial reporting and the corresponding tax base of these assets and liabilities used in the determination of the profits subject to tax. Deferred tax assets and liabilities are generally recognized for all significant temporary differences and are calculated at the rates that will be current at the date on which liabilities are paid and assets are realized.
- iii. A deferred tax asset is recognized to the extent that it can be offset against taxable profits of future periods against which unused tax losses or unused tax credits can be utilized.
- iv. The net presentation of deferred tax assets and liabilities is made when they belong to the same legal entity within the consolidated group.

The effects of the adjustments to deferred tax assets and liabilities resulting from the conversion to IFRS are included in the reconciliation.

3.6) Property, plant and equipment

Property, plant and equipment, except for those related to the fiber optic distribution network, are recorded at historical acquisition or construction cost, less accumulated depreciation and impairment losses. Historic cost includes disbursements directly attributable to the acquisition or construction of the asset.

Assets related to the fiber optic distribution network are recorded at fair value, less accumulated depreciation and impairment losses, which are revalued every 3 to 5 years (or earlier if there is material evidence of a change in fair value). Increases in fair value are recognized directly in Other comprehensive income under "Other reserves". Decreases are first offset against the revaluation surplus and, if they exceed the surplus, are recognized as expense in profit or loss. During interim periods without revaluation (2024 and 2025), no effects on reserves are recorded under this policy.

Borrowing costs for financing related to property, plant and equipment are recognized as an expense when incurred.

Disbursements subsequent to the acquisition or construction are capitalized only when it is probable that future economic benefits associated with the investment will flow to the Company and the costs can be reasonably measured.

As is customary in the industry, the Company adopted the criterion of recording under property, plant and equipment the direct costs associated with customer installations (technical labor, materials), related to the direct costs of the installations of residential customers, in accordance with IAS 16 of IFRS, complying with the requirements established in the standard.

The costs of obtaining contracts with customers are capitalized and amortized based on the average useful life of the customers, which at the date of the separate financial statements is 4 years, and are classified under household installations.

Expenditures made for installations and improvements to properties leased to third parties are valued at cost and are presented as leasehold improvements under property, plant and equipment. Repair and maintenance costs are charged to income of the year in which they are incurred.

Works in progress are transferred to assets in operation at the end of the trial year when they are available for use. From that moment on, they begin to depreciate.

The costs of corrective or preventive maintenance of network assets are recorded as expenses in the income statement for the period, as they do not increase the capacity or useful life of the assets. In the case of improvements and upgrades to transmission equipment or replacement of structural components, these are recorded as an increase in the asset's cost, thereby increasing its carrying amount and being depreciated prospectively.

Expansion, modernization or improvement costs that represent an increase in productivity, capacity or efficiency or an extension of the useful life of the assets, are capitalized as a higher cost of the corresponding assets.

When the carrying amount of an asset exceeds its estimated recoverable amount, its value is immediately reduced to its recoverable amount.

For sales or disposals due to obsolescence of the company's property, plant and equipment, their carrying amount (historical cost less accumulated depreciation) is eliminated, and any difference between the disposal proceeds (if any) and the carrying amount is recognized as a gain or loss in profit or loss for the period in which the disposal occurs, under the lines of Other income by function or Other expenses by function.

3.7) Depreciation of property, plant and equipment

Depreciation on property, plant and equipment is calculated using the straight-line method, considering the cost less residual value over their estimated useful lives. The residual value and useful life of assets are reviewed and adjusted if necessary, at each closing of the financial statements so as to obtain a remaining useful life in line with the expectations for the use of assets.

The Company depreciates the assets of property, plant and equipment from the moment they are ready to be used, distributing the cost of assets on a straight-line basis over the estimated useful life.

The years of useful life are estimated by group of assets, according to their nature and use, of the Company's activities.

The estimated average years of useful life are summarized below:

Property, plant and equipment	Useful lives
Improvement building and constructions	5 years
Computer and communication equipment	3 years
HFC transmission networks	15 years
FTTH transmission networks	20 years
Serialized equipment	4 years
Transmission plants	10 years
Vehicles	7 years
Household installations	4 years
Tools	3 years
Furniture and fixtures	4 years
Other	3 years

The methods of depreciation, useful lives and residual values are reviewed each year and adjusted prospectively if necessary.

Depreciation of facilities owned by third parties is calculated based on the terms of the lease agreements or the best estimate of the period of use of the facilities, to the extent that this can be reliably determined.

3.8) Goodwill

Goodwill is the excess of the cost of acquisition over the fair value of the Company's interest in the identifiable net assets of affiliates at the date of acquisition. Goodwill related to acquisitions of affiliates represents an intangible asset and is included under goodwill.

Goodwill related to acquisitions of associates and merged companies is not amortized, but is tested for impairment annually, together with the total balance of property, plant and equipment.

The Company performs impairment tests on goodwill annually and whenever indicators arise that the carrying amount may not be fully recoverable. The impairment test, which is based on fair value, is performed at the cash-generating unit level. If such fair value is lower than the carrying amount, an irreversible impairment loss is recognized in the income statement.

3.9) Operating Leases

Leases are recognized under IFRS 16 as a right-of-use asset and a corresponding liability at the date the leased asset is available for use by the Company. The financial cost is charged to income during the lease period. The right-of-use asset is depreciated over the shorter of the useful life of the asset and the lease term under the straight-line method.

a) Initial recognition

Right-of-use assets are measured at cost including the following:

- The initial amount of the lease liability.
- Lease payments made on or before the start date.
- Any restoration or dismantling costs.

Lease liabilities include the present value, at the lease inception date, net of the following payments:

- Fixed payments.
- Variable lease payments based on an index or rate.

b) Subsequent measurement

Right-of-use assets should be measured using the cost model, i.e., cost less accumulated depreciation and any accumulated impairment losses, adjusted for any remeasurement of the lease liability, including restatement by indexation units (UF).

Lease liabilities are measured by increasing the carrying amount to reflect the interest on the lease liability and reducing the carrying amount to reflect lease payments made, and should include any new assessments or modifications.

3.10) Intangible assets

Intangible assets are non-monetary assets without physical substance that can be individually identified, either because they are separable or because they derive from a legal or contractual right. Assets whose cost can be measured reliably and from which DB Terra Chile Holdco SpA. and its subsidiaries expect to obtain future economic benefits, according to IAS 38 of IFRS, are recorded in the balance sheet.

Trademarks

As part of the trademarks, an amount of ThCh\$ 84,383,564 is classified, corresponding to "Mundo", which originated from the business combination with Pacífico Cable SpA., detailed in Note 1c) and Note 8. This trademark has an indefinite useful life and undergoes an annual impairment test.

Customer portfolio

The customer portfolio was created as a result of the business combination of Pacifico Cable SpA. with DB Terra Chile Holdco SpA carried out in December 2021, where a customer portfolio of ThCh\$ 9,204,283 was recognized, corresponding to the fair value of active residential customer contracts acquired. This asset is amortized on a straight-line basis over 5 years (estimated useful life based on historical retention behavior), as detailed in notes 1c and 8.

Licenses

The costs of acquired software licenses are capitalized at the value incurred for their acquisition and preparation for use of the specific software. These costs are amortized over their estimated useful lives. Costs related to maintenance, support and updating of computer software associated with licenses are recognized as an expense in the period in which they are incurred.

3.11) Impairment loss of non-monetary assets

Amortized assets are tested for impairment whenever an event or change in circumstances indicates that their book value may not be recoverable. An impairment loss is recognized for the excess of the asset's book value over its recoverable amount. The recoverable amount is the greater of the fair value of an asset less its selling costs, or its value in use.

In order to evaluate impairment losses, assets are grouped at the lowest level at which they separately generate identifiable cash flows (cash generating units). Non-financial assets, other than goodwill, that have been impaired are reviewed at each reporting date to identify whether any revisions of the loss have occurred.

3.12) Financial instruments

The Company's financial assets, within the scope of IFRS 9, are classified as either subsequently measured at amortized cost using the effective interest method or at fair value based on both the entity's business model for managing financial assets and the contractual cash flow characteristics of the financial asset.

At the closing of these financial statements, the Company only presents financial assets classified in:

- a) Cash and cash equivalents includes the following classes of assets: Cash on hand and banks are measured at amortized cost.
Mutual Funds: initially they are valued at the transaction value. Subsequently, they are valued at fair value through profit or loss, which is their quoted unit value at the reporting date.
- b) Trade and other receivables and balances receivable from related parties, that are defined as non-derivative financial assets with fixed or determinable payments that are not quoted on an active market. They are included in current assets, except when they mature in over 12 months, if any, from the reporting date and are classified as non-current assets. Trade and other receivables mainly include: accounts receivable from debtors, loans receivable from related parties, advance payments to suppliers and prepaid expenses.

Recognition:

The Company recognizes cash and cash equivalents at the time of their receipt or disbursement, and trade receivables (accounts receivable) when the contractual right to receive cash flows from the sale of goods or services arises. These assets are initially measured at fair value, which generally corresponds to the transaction amount, including directly attributable transaction costs when they are material.

Subsequent measurement and impairment:

- Cash and cash equivalents: Maintained at nominal value.
- Trade receivables: Measured at amortized cost using the effective interest rate method, considering that collection terms are short-term.
- Impairment: The expected credit loss (ECL) model of IFRS 9 is applied. Provisions are calculated considering the risk of default based on payment history, economic conditions, and debtor characteristics. Losses are recognized in profit or loss.

Derecognition

- Cash: Derecognized when control over the funds ceases (payment, irrevocable transfer).
- Trade receivables: Derecognized only when the rights to the cash flows expire or substantially all the risks and rewards are transferred (for example, in a non-recourse assignment). If the Company retains material risks (such as collection guarantees), the asset remains fully recognized and a liability is recorded for the funds received.

3.13) Provision for bad debts policy

For the case of financial assets of commercial origin, the Company has defined a policy for impairment provisions based on the expected losses for these assets. Expected losses are estimated based on the evaluation of the company's historical payment behavior for each maturity tranche of the asset, thus establishing an expected recoverability index by maturity tranche. These recoverability indices are applied to the asset in order to determine a weighted expected loss, taking into consideration reasonable information about past events and forecasts of future economic conditions.

3.14) Inventories

Inventories are valued at the lower of the cost and the net realizable value. The cost includes all costs arising from its acquisition, as well as all costs incurred to give them their current condition and location. While net realizable value represents the estimated selling price less the costs to be incurred in the marketing, sales and distribution processes.

The cost of inventories is determined using the average cost method.

3.15) Accounts receivable and payable to related parties

Correspond to notes and accounts receivable from and payable to related companies, as defined in IAS 24 of IFRS.

The classification into current and non-current assets and liabilities depends on the maturity of the respective accounts.

3.16) Provisions

Provisions are recognized when the Company has a legal or implicit obligation as a result of a past event; it is probable that the Company will use resources to settle the obligation and the amount of the obligation can be reliably estimated. The amount recognized as a provision represents the best estimate of the payments required to settle the present obligation at the closing date of the financial statements, taking into consideration the risks of uncertainty surrounding the obligation. Such obligation may be legal or implied, arising from, among other factors, regulations, contracts, customary practices or political commitments that create before third parties a valid expectation that the Company will assume certain responsibilities.

i) Staff provision

The Company has made provisions for accrued vacation costs.

ii) Accounts payable for signals

At each reporting date, the Company records the accrued and received service from its signal providers for the service rendered by its suppliers, corresponding to the signals of domestic and international channels transmitted on television. This is estimated based on the following factors: a) The Company's budget according to the contractual conditions agreed with each supplier, and b) The latest invoices issued by the service providers.

iii) Fees payable

The Company has provisioned for the cost of services provided by its consulting and/or advisory services suppliers based on the service proposals, contracts or budgets for each of them, without losing sight of the degree of progress of the service rendered.

3.17) Financial liabilities

DB Terra Chile Holdco SpA. and its subsidiaries classify their financial liabilities in the following categories:

i) Other financial liabilities, trade and other payables. The Company determines the classification of financial assets at the time of initial recognition.

The non-current classification considers whether the liability has a payment horizon of over 12 months from the date of the financial statements.

Financial liabilities are initially classified into: fair value through profit or loss (including derivatives not designated as hedging instruments), derivatives designated as effective hedging instruments, and amortized cost. They are derecognized when the obligation is canceled, settled, or expires.

When an existing liability is replaced by another from the same lender under substantially different terms, or its terms are substantially modified, it is treated as a derecognition of the original liability and recognition of a new liability, and the difference is recognized in profit or loss.

Initial recognition: At fair value. For loans, this includes directly attributable costs (amortized using the effective rate). For fair value through profit or loss, such costs are recognized directly in profit or loss.

Subsequent measurement:

- Amortized cost (interest-bearing loans): Initial nominal value adjusted for amortization (effective rate), less impairment. Example: Bank debts/financial institutions.
- Nominal value (without implicit financial component): Trade payables (Trade and other accounts payable).
- Fair value through profit or loss: Gains/losses in profit or loss (derivatives not designated as hedges).

Amortized cost: Initial measurement - principal repaid $\pm$ accumulated amortization (effective rate) - impairment.

If financing is involved: Present value of future payments, discounted at a similar market rate (term/risk).

Derivatives in effective hedges: Measured at fair value; effective changes in OCI; ineffective changes in profit or loss.

- ii) Hedging derivatives, along with the refinancing in U.S. dollars dated September 2, 2022, October 11, 2022, and July 26, 2023 (see note 15), the Company entered into derivative contracts to convert the dollar-denominated debt into pesos and fix the variable SOFR rate. Additionally, on April 4, 2023, derivative contracts were entered into to fix the variable ICP rate on the peso-denominated portion of the loan. In this way, the total debt is fixed in pesos (except for the ThCh\$ 26,084,100 disbursement on November 29, 2023), as are the interest rates for the tranches with the 4 local banks and the tranche with the 2 international banks (see note 15, Other financial liabilities).

Derivative instruments are recognized at fair value at the date of the statement of financial position and are presented under "Other non-current financial liabilities" or "Other non-current financial assets" depending on whether the fair value is negative or positive, respectively. In the case of instruments designated as hedging instruments, any changes in the fair value of derivatives are recorded in an equity reserve called "Other reserves." The portion of hedges considered ineffective is charged directly to the statement of comprehensive income.

- iii) Transaction costs directly attributable to the issuance of debt (commissions, legal fees) are capitalized as part of the amortized cost and amortized using the effective interest rate (EIR) method. The EIR incorporates all contractual cash flows, transaction costs, and premiums/discounts.
- iv) The Company identifies, assesses, and discloses all financial covenants associated with its debt instruments and financing agreements, which consist of contractual conditions requiring compliance with specific financial indicators (such as debt/EBITDA ratios, minimum capital levels, or interest coverage). These covenants are monitored periodically, and their compliance or non-compliance determines the classification of the debt (short-term or long-term) and may affect the credit terms (such as interest rates or collateral). In case of default, the associated debt is reclassified as a current liability, unless a formal waiver from the creditor has been obtained prior to the reporting date, and the financial and operational consequences are disclosed.

3.18) Share capital

DB Terra Chile Holdco SpA.

The Company was incorporated on November 24, 2021, issuing 100 shares of par value Ch\$ 10,000 each. Paid-in capital amounted to Ch\$ 1,000,000. Then on December 28, 2021, 37,894,488 new shares are issued at a par value of Ch\$ 10,000 and for a total paid-in capital of Ch\$ 378,944,880,600.

On January 7, 2022, 1,515,126 new shares are issued at par value Ch\$ 10,000 each for a total paid-in capital of Ch\$ 15,151,256,949. Finally, on November 2, 2022, 1,404,525 new shares (par value \$10,000 each) are issued for a total capital amount of \$14,045,250,000.

The following capital increases were carried out during 2023:

- On January 12, 2023, 833,730 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 8,337,300,000.
- On January 30, 2023, 104,408 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 1,044,082,000.
- On February 7, 2023, 804,790 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 8,047,900,000.
- On February 28, 2023, 1,246,860 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 12,468,600,000.
- On April 18, 2023, 2,403,780 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 24,037,800,000.
- On June 7, 2023, 1,396,133 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 13,961,325,000.
- On August 14, 2023, 2,730,560 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 27,305,600,000.

3.19) Dividends

Interim and definitive dividends are recorded as a decrease in shareholders' equity at the time of their approval by the competent body, which is the responsibility of the Ordinary Shareholders' Meeting.

As of the closing date of the financial statements for 2025 and 2024, the company has not defined a dividend distribution policy.

3.20) Income and expense recognition

Revenues are recognized in the income statement on an accrual basis, i.e. to the extent that it is likely that economic benefits will flow to the Company and can be reliably measured, regardless of the moment when the cash or financing derived therefrom occurs.

The Company's revenues arise mainly from the provision of the following telecommunications services:

- a) Services to residential customers: Plans with different combinations of television, internet, fixed telephony and mobile telephony services.
- b) Services to companies: For lease of infrastructure, construction, maintenance and other services.

All associated costs, except those related to network expansion, as well as administrative and commercial expenses, are recognized in the income statement as incurred.

Leases and other services are charged to income as services are rendered.

Commercial package offers that combine different elements in the telephony, internet and television activities are analyzed to determine by concept the revenue recognition, applying in each case the appropriate revenue recognition criteria.

All expenses related to these mixed commercial offers are charged to the income statement as incurred.

Sales discounts - Revenues are presented net of discounts granted to customers.

3.21) Cost of sales

Cost of sales is comprised of direct costs related to the content and basic inputs of each service provided and indirect costs associated with operating, technical and commercial activities, as well as depreciation, amortization and other costs.

3.22) Environment

Due to the characteristics of the Company, the activities it performs and the services it provides to its customers, no disbursements or investments are made under this item.

3.23) Accounting policies and estimates

- a) Accounting policies and estimates: Change in the presentation of the income statement:

During 2024, the entity has modified the presentation of its income statement to provide greater transparency and alignment with industry best practices. Previously, cost of sales was presented as a single line item. From the 2024 period onward, these expenses have been broken down into the following categories:

- o Cost of sales
- o Access to fiber optic infrastructure
- o Operational depreciation

This change is made in accordance with the requirements of IAS 1 “Presentation of Financial Statements,” which establishes that expenses should be presented either by their nature or function, allowing for greater clarity and comparability. Additionally, IAS 8 requires that changes in the presentation of the Separate Financial Statements be justified and adequately disclosed, ensuring that users understand the impact of the change. The change in the presentation of the income statement does not affect the total amounts of revenues, expenses, or income for the period. However, it provides greater detail on the composition of operating expenses, allowing for a better understanding of the entity’s financial performance.

During 2025, the Company made minor reclassifications and openings in the presentation of certain balances corresponding to the 2024 and 2023 fiscal years, in order to improve the presentation and comparability of the consolidated financial statements.

b) Except for the matters described in point a) and the new accounting pronouncements, these Separate financial statements as of December 31, 2025, do not present changes in accounting policies and estimates compared to the financial year ended December 31, 2024.

3.24) Business combination

Business combinations are accounted for using the acquisition method, except for certain assets and liabilities that are recorded following the valuation principles established in other standards, as required by IFRS 3 “Business Combinations”. The application of the acquisition method requires: i) Identifying the acquirer, ii) Determining the acquisition date, iii) Recognition and measurement of the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree, and iv) Recognition and measurement of goodwill or gain on acquisition on highly advantageous terms. The application of the recognition principle and conditions may result in the recognition of some assets and liabilities that the acquiree has not previously recognized as such in its financial statements, for example, identifiable intangible assets acquired that were developed internally and affected results for the period in which the expense was incurred. For each business combination, DB Terra Chile Holdco SpA. will measure the identifiable assets acquired and liabilities assumed at their fair values at the acquisition date. Meanwhile, the components of non-controlling interests are measured at fair value or at the proportionate share of the acquiree’s identifiable net assets. If the acquisition cost exceeds the fair value of the acquiree’s net assets, goodwill is recognized. On the contrary, if the acquisition cost is lower than the fair value of the acquiree’s net assets, the gain is included in the Consolidated Statement of Comprehensive Income under Other gains (losses).

In a business combination achieved in stages, the previously held equity interest of the acquiree is remeasured at its fair value at the acquisition date and the resulting gain or loss, if any, is recognized in profit or loss for the period or in other comprehensive income, as appropriate.

When the Company carries out a reverse merger (the subsidiary absorbs its parent), the goodwill is recorded in the statement of financial position of the continuing entity. In this merger, the parent company is dissolved, transferring all its assets and shareholders or partners to the subsidiaries, which is the legal successor and succeeds it in all its rights and obligations. A business combination under common control is accounted for using the pooling of interests method. Under this method, the assets and liabilities involved in the transaction remain reflected at the same carrying amount at which they were originally recorded. Any difference between the assets and liabilities contributed to the consolidation and the consideration given is recorded in the item Other Reserves within Equity.

3.25) Operating segments

Segment information is presented consistently with the internal reports provided to the company’s Management, which is responsible for allocating resources and evaluating the performance of the operating segments. Management identifies its operating segments based on the markets in which it participates, namely the residential and wholesale markets, for which strategic decisions are made. Intercompany transactions are eliminated between segments at the consolidated level. Financial expenses from financing are not separated by operating segments because the Group manages debt at the consolidated level. This financial information by operating segments is detailed in Note 26.

NOTE 4 - CASH AND CASH EQUIVALENTS

Cash and cash equivalents at the end of each period is as follows:

<u>Detail</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Cash on hand	44,428	46,063
Petty cash	72,100	93,803
Cash in banks	1,431,774	1,898,347
Mutual funds	24,519,721	16,364,921
Total	26,068,023	18,403,134

a) Mutual funds

The detail of the mutual funds at year end are presented below:

<u>Detail</u>	<u>Bank</u>	<u>Currency</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Mutual funds	BCI	USD	3,120,498	1,503,507
Mutual funds	Scotiabank	USD	1,971,085	5,818,094
Mutual funds	Scotiabank	Ch\$	3,186,146	2,862,336
Mutual funds	Santander	Ch\$	6,726,146	-
Mutual funds	BCI	Ch\$	8,649,635	4,809,178
Mutual funds	Estado	Ch\$	866,211	1,371,806
Total			24,519,721	16,364,921

The mutual funds held by the entity at the end of each fiscal year comply with the description in Note 3.4. These are initially valued at the transaction value. Subsequently, they are valued at fair value through profit or loss, which is their quoted unit value at the reporting date.

b) Balances by currency that compose cash and cash equivalents are as follows:

<u>Detail</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
US Dollars	5,136,335	9,782,593
Chilean pesos	20,890,091	8,551,521
Euros	41,597	69,020
Total	26,068,023	18,403,134

Cash and cash equivalents are not subject to availability and use restrictions to be reported.

c) Statement of cash flows

Below is the detail of the item "Other cash inflows (outflows)"

	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Bank fees on issue of new loans	(801,887)	(334,917)	(781,074)
Waiver fees to banks	(604,375)	(642,658)	-
Legal expenses	(609,323)	(396,332)	(202,929)
Bank fees	(83,193)	(83,193)	(83,194)
Stamp tax	(705,614)	(270,335)	(1,200,800)
Total	(2,804,392)	(1,727,435)	(2,267,997)

NOTE 5 - OTHER NON-FINANCIAL ASSETS, CURRENT

The composition of other non-financial assets as of each year end is as follows:

<u>Detail</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Guarantees received	657,081	726,608
Total	657,081	726,608

NOTE 6 - TRADE AND OTHER RECEIVABLES

a) The composition of current receivables is as follows:

<u>Detail</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Trade debtors	31,156,873	26,276,035
Doubtful debt estimate	(21,985,902)	(19,167,185)
Subtotal accounts receivable, net	9,170,971	7,108,850
Collections receivable (1)	2,808,093	3,066,933
Notes receivable	706	16,225
Balances with employees	39,993	31,659
Prepayments to suppliers and others	530,375	582,437
Sundry receivables from inventory sales	552,451	272,775
Total	13,102,589	11,078,879

(1) Corresponds to accounts receivable from Transbank, Unired, Sencillito, Caja Vecina, Serviestado, among others, and are originated by the collection made by these institutions on behalf of the subsidiary Pacifico Cable SpA.

b) The maturities of trade and other receivables at December 31, 2025 and 2024 are as follows:

<u>Trade payables net of impairment by due date</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Not overdue	11,677,555	7,533,054
0 to 30 days	304,691	1,636,247
31 to 60 days	196,596	414,138
61 to 90 days	90,627	415,373
91 to 120 days	65,970	117,286
121 to 180 days	67,035	320,118
Over 180 days	700,115	642,663
Total	<u>13,102,589</u>	<u>11,078,879</u>

c) The movements of the estimate for doubtful accounts are as follows:

<u>Movements</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Opening balance	19,167,185	16,413,800
Impairment loss recognized	2,818,717	2,753,385
Impairment reversal (1)	-	-
Write-offs (1)	-	-
Closing balance	<u>21,985,902</u>	<u>19,167,185</u>

(1) For the years ended December 31, 2025 and 2024, no write-offs or reversals of impairments determined based on the Company's policies have occurred (see note 2.4).

The model calculates the provision according to the collections made by doubtful accounts receivable and the portion of unpaid past-due debt at a certain period of time. In this case, the calculation is made monthly, and considers the payment behavior of the last 24 months.

NOTE 7 - INVENTORIES

a) The breakdown of this item is as follows:

<u>Detail</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
Central warehouse	26,876,356	40,110,102
Technical warehouse	11,521,479	6,048,016
Warehouse in transit	10,940,537	5,338,016
Contractors' warehouse	2,591,423	3,235,204
Operations warehouse	1,407,762	1,648,019
Other warehouses	3,645,078	7,496,195
Impairment for obsolescence of materials	(1,382,303)	(233,979)
Total	<u>55,600,332</u>	<u>63,641,573</u>

b) The movement of the obsolescence allowance as of each year end is as follows:

	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Opening balance	(233,979)	-
Write-offs in warehouses	218,672	235,770
Increase for obsolescence	(1,366,996)	(469,749)
Closing balance	<u>(1,382,303)</u>	<u>(233,979)</u>

The increase in the obsolescence provision is due to a survey of technological infrastructure conducted during the 2025 period compared to the previous year, mainly associated with platforms based on HFC (Hybrid Fiber Coaxial) technologies. Therefore, the industry has accelerated the transition towards more modern technologies such as FTTH (Fiber to the Home) and fully optical access networks, reducing the development, maintenance, and replacement of equipment compatible with HFC.

c) The movements of inventories are as follows:

<u>Movement</u>	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Opening balance	63,641,573	54,969,050
Purchases	63,135,813	73,026,384
Transfer to property, plant and equipment	(64,330,591)	(57,863,162)
Consumption (1)	(5,210,962)	(3,446,411)
Obsolescence provision	(1,148,324)	(233,979)
Other movements	(487,177)	(2,810,309)
Total	<u>55,600,332</u>	<u>63,641,573</u>

(1) *The consumptions described above are classified in cost of sales under the items "internet, television, and telephony service costs" and "other service costs" in the statement of income for both years.*

The Company initially classifies as inventories those equipment, materials, and network components acquired for installation in telecommunications services.

Such assets are reclassified to Property, Plant, and Equipment when installed and available for use, or to construction in progress while the assets are not yet available for use, at which point they start generating future economic benefits.

The transfer is made at the weighted average cost of the inventory, plus the costs directly attributable to its installation.

During 2025 and 2024, transfers were made from inventories to property, plant and equipment for the following items:

<u>Item</u>	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Computer equipment	14,308	6,061
Portable equipment	451,521	390,089
Furniture and fixtures	-	27,174
Construction in progress	27,415,490	24,374,570
Other property, plant and equipment	1,040,754	104,035
Household materials	4,620,017	4,307,624
Vehicles	8,423	-
Serialized equipment	30,780,078	28,653,609
Total	<u>64,330,591</u>	<u>57,863,162</u>

NOTE 8 - INTANGIBLE ASSETS OTHER THAN GOODWILL

a) Intangible assets other than goodwill are detailed as follows:

<u>Detail at 12-31-2025</u>	<u>Gross</u>	<u>Accumulated</u>	<u>Net</u>
	<u>ThCh\$</u>	<u>amortization</u>	<u>ThCh\$</u>
		<u>ThCh\$</u>	
Concessions	5,000	-	5,000
Licenses	17,546,720	(14,852,820)	2,693,900
Trademark	84,383,564	-	84,383,564
Customer portfolio	9,204,283	(7,363,426)	1,840,857
Total	111,139,567	(22,216,246)	88,923,321

<u>Detail at 12-31-2024</u>	<u>Gross</u>	<u>Accumulated</u>	<u>Net</u>
	<u>ThCh\$</u>	<u>amortization</u>	<u>ThCh\$</u>
		<u>ThCh\$</u>	
Concessions	5,000	-	5,000
Licenses	12,064,395	(10,507,929)	1,556,466
Trademark	84,383,564	-	84,383,564
Customer portfolio	9,204,283	(5,522,571)	3,681,712
Total	105,657,242	(16,030,500)	89,626,742

b) Changes in intangible assets by class are as follows:

Vehicles	1,160,315	(834,643)	325,672	791,175	(648,312)	142,863
Furniture and fixtures	1,362,796	(1,013,665)	349,131	1,325,004	(885,026)	439,978
Other property, plant and equipment	2,392,596	(1,760,454)	632,142	1,222,663	(869,032)	353,631
Leased assets	859,366	(257,484)	601,882	1,457,439	(415,925)	1,041,514
Construction in progress	28,502,251	-	28,502,251	50,023,851	-	50,023,851
Household installations (1)	162,904,624	(97,854,389)	65,050,235	132,055,752	(67,499,587)	64,556,165
	<u>1,122,559,402</u>	<u>(362,336,482)</u>	<u>760,222,920</u>	<u>1,018,165,025</u>	<u>(259,499,828)</u>	<u>758,665,197</u>

(1) An allowance for PPE impairment is recorded based on 3% of the accumulated total of home equipment and installations, with respect to the third month of installation. (For the calculation of the provision as of December 31, 2025 and 2024, the accumulated balance as of September of each year is considered).

In 2025 and 2024, works in progress were concluded, transferring assets in the amount of ThCh\$ 62,203,774 (ThCh\$ 18,915,621 in 2024) to transmission networks and transmission plants, as part of the Company's expansion process.

At the same time, following the criterion of capitalizing the direct costs related to with the operations of residential customer installation services, an amount of ThCh\$ 16,186,020 in 2025 was recognized as property, plant and equipment (ThCh\$ 15,878,239 in 2024).

As mentioned in note 3.6), in 2025, remunerations in property, plant and equipment have been capitalized in the amount of ThCh\$ 16,041,991 (ThCh\$ 22,523,495 in 2024). These amounts are included under the items Household installations and Works in progress. The wages and salaries included correspond to the technicians who carry out the installation of the services and those who participate in the construction of the network and transmission plants.

Movements in property, plant and equipment were as follows:

b) Changes in property, plant and equipment by class as of December 31, 2025 and 2024:

c) Depreciation for the year

Depreciation of fixed assets is recorded in the statement of income within Operating depreciation and Depreciation and amortizations as of December 31, 2025 ThCh\$ 101,260,476 and ThCh\$ 179,113, respectively. ThCh\$ 85,539,823 and ThCh\$ 277,032 as of December 31, 2024 and ThCh\$ 68,296,269 and ThCh\$ 301,940 as of December 31, 2023 (*note 21 and 22*).

The depreciation of Right-of-use assets is recorded in the income statement under Operating depreciation. As of December 31, 2025, the amount totals ThCh\$ 8,195,774, and as of December 31, 2024, the amount was ThCh\$ 6,683,796 and ThCh\$ 5,631,268 as of December 31, 2023 (*note 21*).

d) Assets pledged as collateral: For the years ended December 31, 2025 and 2024, there are no assets pledged as collateral, held as security, or mortgaged with third parties.

e) Fair value

In accordance with the Company's accounting policies (see Note 3.6) and in compliance with the provisions of IFRS 13, the assets corresponding to the Company's fiber optic distribution network are measured at fair value, whether for revaluation purposes, impairment assessment, or as part of the measurement processes for recoverable amount.

Definition of fair value: Fair value is defined as the price that would be received for selling an asset or paid for transferring a liability in an orderly transaction between market participants at the measurement date (known as "exit price").

Fair value hierarchy: Classifies the input data for valuation techniques into three levels:

Level 1: Quoted prices in active markets for identical assets or liabilities (the most reliable).

Level 2: Inputs other than quoted prices that are observable (e.g., prices of similar assets).

Level 3: Unobservable inputs (based on the Company's best assumptions).

The fair value measurements for the Company are detailed as follows:

<u>Asset</u>	<u>Basis of measurement</u>	<u>Hierarchy level</u>
Fiber optic distribution networks	Fair value	Level 3

Fair value approaches

Market approach: Uses prices from actual transactions of identical or similar assets (Direct comparison).

Costs approach: Calculates how much it would cost to replace the asset today, less depreciation (Replacement cost).

Income approach: Calculates the present value of the future benefits or cash flows the asset will generate (Discounted cash flow).

The valuation techniques used by the Company correspond to the income approach, considering assumptions such as remaining economic useful life, discount rates, cash flow generation capacity, and market conditions. These assumptions represent the best estimates of Management, based on information available at the measurement date.

Regarding the assets valued under the revaluation model, the last appraisal was carried out on June 30, 2023. The application of this appraisal resulted in adjustments to the carrying amounts of the assets, as well as to the Company's equity, amounting to ThCh\$ 188,513,685. As of December 31, 2024 and 2025, no revaluations have been made. Therefore, there are no entries for this concept.

For interim periods between revaluations, the Company applies monitoring of the fair value of its fiber optic networks (*see note 3.6*).

NOTE 10 - RIGHT-OF-USE ASSETS

Right-of-use assets are measured at cost, which includes the initial amount of the lease liability adjusted for lease payments made before the contract commencement date, incentives received, and initial direct costs. Depreciation of these assets is recognized systematically over the lease term.

The accounting policies applied are consistent with those described in note 3.9 (Accounting policies).

The breakdown of the items comprising this caption and the related accumulated amortization is as follows:

Item	12-31-2025			12-31-2024		
	Property, plant and equipment		Property, plant and equipment	Property, plant and equipment		Property, plant and equipment
	<u>Gross</u>	<u>Amortization</u>	<u>Net</u>	<u>Gross</u>	<u>Amortization</u>	<u>Net</u>
	ThCh\$	ThCh\$	ThCh\$	ThCh\$	ThCh\$	ThCh\$
Rights of use (1)	46,050,004	(20,089,410)	25,960,594	39,485,372	(14,956,754)	24,528,618
Total	46,050,004	(20,089,410)	25,960,594	39,485,372	(14,956,754)	24,528,618

(1) Corresponds to the rights of use associated with lease contracts for real estate and vehicles under IFRS 16.

The amortization of right-of-use assets is recorded in the income statement under Operating depreciation. As of December 31, 2025, the amount totals ThCh\$ 8,195,774, as of December 31, 2024, the amount was ThCh\$ 6,683,796 and as of December 31, 2023, the amount was ThCh\$ 5,631,268 (*note 21*).

The movement of accumulated amortization is as follows:

<u>Detail</u>	ThCh\$
Opening balance	14,956,754
Amortization for the year	8,195,774
Disposals	(5,025,834)
Other	1,962,716
Closing balance	20,089,410

The movements in the items comprising property, plant and equipment as of December 31, 2025 and 2024 are as follows:

	2025	2024
	Right-of-use assets	Right-of-use assets
	ThCh\$	ThCh\$
Opening balance	24,528,618	17,560,474
Additions	10,269,808	17,336,533
Readjustment	380,081	335,191
Divestitures	(425,811)	(2,204,529)
Depreciation expense	(8,924,891)	(9,102,271)
Transfers	132,789	603,220
Closing balance	25,960,594	24,528,618

Capitalized costs for residential installations in 2025 and 2024 amount to ThCh\$ 2,399,399 and ThCh\$ 2,205,500, respectively.

Based on IFRS 16, the company has elected not to recognize right-of-use assets for lease contracts that meet the following criteria:

- Short-term leases (terms of less than 12 months without a purchase option).
- Low-value leases (individual assets of low cost).
- Lease contracts that do not transfer control: Agreements that, after assessing their economic substance, do not grant the right to control the use of the underlying asset.

Below are the amounts recorded in the income statement for lease contracts not considered right-of-use assets:

Contract	<u>2025</u>	<u>2024</u>
	ThCh\$	ThCh\$
Leases that do not transfer control (1)	3,489,574	3,990,165
Total	3,489,574	3,990,165

- (1) Corresponds to the lease of poles on which transmission networks are installed is not for the company's exclusive use. Therefore, they are not recognized as right-of-use assets under IFRS 16.

The undiscounted minimum payments for future commitments of leases not recognized as right-of-use assets are as follows:

Contract	Less than 1 year	Between 2 and 5 years	More than 6 years
	ThCh\$	ThCh\$	ThCh\$
Leases that do not transfer control	3,127,007	10,835,699	16,264,898
Total	3,127,007	10,835,699	16,264,898

NOTE 11 - GOODWILL

The goodwill maintained by DB Terra Chile Holdco SpA. and subsidiaries for the years 2025 and 2024 is as follows:

<u>Item</u>	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Opening balance	81,462,673	81,462,673
Closing balance	81,462,673	81,462,673

On September 26, 2019, Pacífico Red SpA. acquired all the shares of Pacífico Cable SpA. from Nueva Inversiones Lago Esmeralda Limitada. As a result of the business combination, a capital gain of ThCh\$ 81,462,673 was generated.

Subsequently, on March 5, 2020, it was agreed to merge Pacífico Cable SpA. and Pacífico Red SpA. by incorporation, with Pacífico Cable SpA. absorbing Pacífico Red SpA, thus remaining the continuator with the aforementioned goodwill.

DB Terra Holdco SpA has performed an impairment assessment in accordance with the provisions of IAS 36 "Impairment of Assets", detailed as follows:

As previously mentioned, goodwill arising from the business combination of the subsidiary Pacífico Cable SpA. is allocated to it as a single cash-generating unit (CGU), given that:

- (i) the subsidiary operates as an integrated unit (network, customers, and indivisible services),
- (ii) management monitors goodwill at this level,
- (iii) a reasonable allocation to smaller CGUs is not possible.

After analyzing external impairment indicators (such as market changes or economic conditions) as well as internal indicators (operational performance or strategic changes), no impairment indicators have been identified for the years ended December 31, 2025 and 2024 that suggest a reduction in the recoverable amount of goodwill, which is why no impairment loss has been recognized during these periods. The strategic analysis assumes that the company will continue to grow between 3% and 5% annually over the next five years. As of December 31, 2025, a pre-tax discount rate of between 8% and 10% was applied in determining the recoverable amount of the unit. The discount rate corresponds to the weighted average cost of capital (WACC), based on a CAPM model.

NOTE 12 - CURRENT TAX ASSETS AND LIABILITIES

Current tax assets and liabilities are as follows:

	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
<u>Current tax assets</u>		
Lease credits	120,000	33,601

NOTE 14 - BALANCES AND TRANSACTIONS WITH RELATED PARTIES

The composition of current accounts receivable from related parties for the years 2025 and 2024 is as follows:

<u>Entity name</u>	<u>Relationship</u>	<u>Currency</u>	<u>Transaction description</u>	<u>12-31-2025</u> ThCh\$	<u>12-31-2024</u> ThCh\$
DB Terra Chile Parent SpA.	Parent	Ch\$	Collection from payment suppliers	2,618	2,462
			Total	2,618	2,462

- a) As of December 31, 2025 and 2024, the key personnel of DB Terra Chile Holdco SpA consist solely of executives, who are simultaneously executives of Pacífico Cable SpA, given the 100% direct control over this subsidiary.

The executives' remuneration consists exclusively of fixed monthly salaries plus variable annual bonuses based on goal achievement, with no extraordinary compensations of any kind, amounting to ThCh\$ 2,727,514 in 2025 (ThCh\$ 1,975,513 in 2024). There are also no outstanding loans or guarantees from the Company to key personnel.

DB Terra Chile Holdco SpA provides management services to Pacífico Cable SpA under market terms, which are included within charges for back office services, use of the fiber optic network, use of customer management software (CRM), among others. These charges are eliminated in these consolidated financial statements.

- b) Significant transactions with related companies

The main transactions between related companies during 2025 and 2024 are the following:

2025:

<u>Tax ID No.</u>	<u>Entity</u>	<u>Relationship</u>	<u>Transaction description</u>	<u>Currency</u>	<u>12-31-2025</u>	<u>Effect on income charge/(credit)</u>

(1) It corresponds to hedging assets and liabilities related to swap derivatives, valued at mark-to-market as of the year-end of 2025 and 2024.

On March 16, 2022, DB Terra Chile Holdco SpA signed a new loan agreement ("CREDIT AGREEMENT") with Scotiabank Chile, Banco de Credito e Inversiones, Banco BTG Pactual Chile, and Banco Internacional for a total amount of \$ 205,000,000,000. The agreed rate was TAB and the margin was 3.80%. With debt service payments at the end of each quarter (March, June, September and December). No derivatives were established to fix the TAB rate. The maturity of this contract was set for March 16, 2027. On March 23, 2022, with the proceeds of this financing, the existing loan with the financial institutions described was fully prepaid: Fondo de Inversión Santander Deuda Privada, Banco Santander Chile, Banco BTG Pactual Chile, Banco Internacional, Principal Compañía de Seguros de Vida Chile S.A., Metlife Chile Seguros de Vida S.A., Banco de Crédito e Inversiones, and Banco Scotiabank Chile.

Then, on September 2, 2022, the deferred amounts (DDTL) committed in the first amendment ("Amendment 1") to the credit agreement entered into on March 16, 2022 ("AMENDMENT No. 1 TO CREDIT AGREEMENT AND JOINDER AGREEMENT") were disbursed, where Banco de Crédito e Inversiones disburses an additional loan amount in pesos of Ch\$ 12,500,000, which was fully disbursed on the date the amendment was signed. The loan conditions for this disbursement are the same as the original loan agreement signed on March 16, 2022. Additionally, the international banks Banco Latinoamericano de Comercio Exterior S.A. ("Bladex") and ING Capital LLC ("ING") each committed a credit line in U.S. dollars for USD 20,000,000. On the day the amendment agreement was signed, each foreign bank disbursed USD 2,600,000 (total disbursed in dollars USD 5,200,000) and on October 11, 2022, each foreign bank disbursed USD 11,681,655 (total disbursed in dollars USD 23,363,310). The agreed rate was SOFR and the agreed margin was 3.80%, plus a SOFR adjustment of 0.15%. Cross-currency and interest rate swap derivative contracts were signed with Banco Scotiabank Chile for the total amount disbursed (USD 28,563,310), which allowed the all-in interest rate to be fixed at 12.01% (USD 5,200,000 portion), 11.67% (USD 7,500,000 portion) and 11.63% (USD 15,863,310 portion).

On April 4, 2023, the second amendment to the credit agreement ("Amendment 2") was signed regarding the peso-denominated tranche, where the nominal TAB reference rate was eliminated and replaced by the nominal ICP rate. Additionally, the margin on the peso tranche was adjusted to 4.35% (previously 3.80%).

On April 5, 2023, interest rate swap (IRS) derivative contracts were signed with Scotiabank for Ch\$ 89,666,666,667, Internacional for Ch\$ 17,000,000,000, and BCI for Ch\$ 110,833,333,333, where the IPC rate was fixed at 6.26% (Scotiabank), 6.28% (Internacional), and 6.29% (BCI), resulting in a fixed rate including the margin of 4.35% to 10.61%, 10.63%, and 10.64%, respectively.

On July 26, 2023, the balance of the line of credit in dollars committed by Bladex and ING banks was disbursed. The total disbursement was USD 11,436,690 (50% each bank). The agreed rate and conditions were the same as those stipulated in the original credit agreement for the U.S. dollar-denominated loan tranche. On August 3, 2023, a cross-currency and interest rate swap derivative contract was signed with Banco Scotiabank Chile for the total amount disbursed (USD 11,436,690), which allowed the All-in interest rate to be fixed at 9.46%.

On November 29, 2023, the amendment to the loan agreement ("Amendment 3") was signed, whereby the international bank Goldman Sachs disbursed USD 30,000,000 under the existing terms of the active credit facility, U.S. dollar tranche.

On June 28, 2024, a capital payment waiver was agreed upon (Waiver Loan Agreement Amendment), modifying the original credit agreement dated March 16, 2022, regarding the capital payment schedule, deferring capital installments until September 30, 2025, while maintaining the maturity date of March 16, 2027, and other terms of the original credit.

On July 3, 2024, a new amendment to the credit agreement dated March 16, 2022 (Incremental Facility Joinder and Amendment No. 4) was signed, agreeing to increase the credit by CLP 10,000,000,000 from Scotiabank Chile and an additional USD 10,000,000 from Bladex, under the same terms as the original loan and its amendments. On July 8, the disbursements of the aforementioned loans were made effective.

On July 12, 2024, a new amendment to the original credit agreement dated March 16, 2022 ("Incremental Facility Joinder and Amendment No. 5") was signed, agreeing to incorporate two new loans: the first for USD 10,000,000 with Prival Credit Opportunities Origination Vehicle I (Prival Credit) and another USD 5,000,000 with Prival Bank, SA (Prival Bank). The disbursements of the indicated loans were made on July 22.

On August 16, 2024, three new cross currency swap (CCS) derivative contracts were signed with Scotiabank Chile to hedge U.S. dollar obligations, setting an exchange rate of USD/Ch\$ 950 and an "all-in interest rate" of 8.795% (outstanding debt with Goldman Sachs for USD 29,625,000), a fixed interest rate of 8.83% (outstanding debt with USD 15,000,000 Prival Credit), and a fixed interest rate of 8.73% (outstanding debt with USD 10,000,000 Bladex).

On March 14, 2025, a new amendment to the original credit agreement dated March 16, 2022 (Incremental Facility Joinder and Amendment No. 6) was signed, agreeing to incorporate three new loans: the first for USD 7,500,000 with Prival Credit Opportunities Origination Vehicle I (Prival Credit), another for USD 3,500,000 with Prival Bank SA (Prival Bank), and finally CLP 15,000,000,000 with BTG Pactual Chile. The disbursements of the indicated loans were made on March 19.

On March 19, 2025, one new cross currency swap (CCS) derivative contract was signed with Scotiabank Chile to hedge U.S. dollar obligations, setting an exchange rate of USD/Ch\$ 921 and an "all-in interest rate" of 8.94% (outstanding debt with Prival Bank for USD 3,456,250 and with Prival Credit Opportunities Fund I, LP for USD 7,406,250).

On April 15, 2025, a new amendment to the original credit agreement dated March 16, 2022 (Incremental Facility Joinder and Amendment No. 7) was signed, agreeing to incorporate one new loan for USD 35,000,000,000 with Banco Santander Chile. The disbursement of the indicated loan was made on April 15.

On July 28, 2025, a new amendment to the original credit agreement dated March 16, 2022 (Incremental Facility Joinder and Amendment No. 7) was signed, agreeing to incorporate one new loan for USD 8,900,000,000 with Banco Santander Chile. The disbursement of the indicated loan was made on July 29.

b) Hedging derivatives: Swap derivatives are presented at mark-to-market as of the year-end 2025 and 2024.

The Company uses derivative instruments to manage its exposure to foreign exchange and interest rate risks mainly associated with its financial debt in Chilean pesos and foreign currency instruments. These derivatives are designated as cash flow hedges for both the ICP/SOFR interest rate and the USD/CLP exchange rate, in accordance with the requirements of IFRS 9.

The derivatives contracted include cross currency swaps (CCS) and interest rate swaps (IRS). CCS are used to simultaneously hedge both exchange rate and interest rate risk on loans denominated in US dollars, while IRS are used to convert variable rates into fixed rates on debt denominated in Chilean pesos.

The change in the fair value of hedging derivatives that are considered effective is recognized in Other Comprehensive Income (OCI) under “Cash flow hedge reserve” and is reclassified to profit or loss in the same line item where the financial expense of the hedged item is recognized, as the cash flows of the underlying loan accrue. The ineffective portion, when material, is recognized directly in profit or loss for the period within Finance costs.

Conversely, the change in the present value of the cash flows of the hedged loans (to the extent hedged) is considered when determining the adjusted carrying amount of such liabilities, so that the overall hedging effect (derivative + hedged item) produces the contractually fixed interest rate and exchange rate profile.

The detail of the hedging derivative instruments as of December 31, 2025 and 2024, by type of risk hedged, instrument, notional amount, and fair value is as follows:

Entity	Hedging	Hedged item	Type of instrument	Risk hedged	Currency	Settlement	Maturity	2025		2024	
								Asset ThCh\$	Liabilities ThCh\$	Asset ThCh\$	Liabilities ThCh\$

Financial instruments recognized at fair value in the Consolidated Statement of Financial Position are classified according to the hierarchy defined in IFRS 13:

LEVEL 1: Quoted prices in active markets for identical assets/liabilities (e.g., listed shares, sovereign bonds). Not applicable in 2025/2024.

LEVEL 2: Valuation techniques using directly or indirectly observable market inputs (interest rate curves, FX forwards, implied volatilities), without material unobservable adjustments. APPLIES TO: CCS/IRS derivatives (mark-to-market Bloomberg).

LEVEL 3: Techniques using significant unobservable inputs (internal projections, own WACC). Not applicable in 2025/2024.

c) The maturity profile of bank loans and other financial creditors as of December 31, 2025 and 2024, undiscounted, is as follows:

<u>Detail at 12-31-2025</u>	<u>90 days</u>	<u>90 days to 1 year</u>	<u>Total Current</u>	<u>2 to 3 years</u>	<u>4 to 7 years</u>	<u>Total Non-current</u>

Euro	4,470,835	3,289,987
Total	<u>83,616,208</u>	<u>90,188,503</u>

c) Trade and other payables are detailed as follows:

<u>Trade accounts</u>	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Not due	77,554,773	80,812,346
Overdue - 31 to 60 days	170,518	329,175
Overdue - 61 to 90 days	70,224	184,461
Overdue - 91 to 120 days	29,978	219,789
Overdue - 121 to 180 days	5,901	108,600
Overdue - Over 180 days	597,376	173,852
Total	<u>78,428,770</u>	<u>81,828,223</u>

The term of trade accounts payable not yet due reflects the payment terms previously agreed with suppliers.

NOTE 18 - LIABILITIES FOR EMPLOYEE BENEFITS

The breakdown of this item is as follows:

	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Provision for staff vacations	<u>2,580,226</u>	<u>3,445,223</u>
Total	<u>2,580,226</u>	<u>3,445,223</u>

NOTE 19 - OTHER NON-FINANCIAL LIABILITIES

The breakdown of this item is as follows:

	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Income received in advance from contracts with customers	<u>1,460,797</u>	<u>1,131,830</u>
Total	<u>1,460,797</u>	<u>1,131,830</u>

Liabilities from customer contracts represent payments for fiber optic network installation contracts.

Movement for the year

	2025	2024
	ThCh\$	ThCh\$
Opening balance	1,131,830	445,123
Advance payments received	356,075	716,621
Revenue recognized from payments for the period	<u>(27,108)</u>	<u>(29,914)</u>
Closing balance	<u>1,460,797</u>	<u>1,131,830</u>

NOTE 20 - EQUITY

a) Paid-in and subscribed capital and number of shareholders

As of December 31, 2025 and 2024, the subscribed and paid-in capital of DB Terra Chile Holdco SpA. amounts to ThCh\$ 503,344,995, and is composed as follows:

Shareholder	<u>12-31-2025</u>	% Interest	<u>12-31-2024</u>	% Interest
	No. of shares		No. of shares	
DB Terra Chile Parent SpA.	50,334,500	100%	50,334,500	100%
Total	50,334,500	100%	50,334,500	100%

b) Reconciliation of shares

A reconciliation between the number of shares outstanding at the beginning and end of the years reported is presented below:

<u>Movement of shares</u>	<u>12-31-2025</u>	<u>12-31-2024</u>
Opening balance shares DB Terra Chile Holdco SpA.	50,334,500	50,334,500
Closing balance	50,334,500	50,334,500

On November 24, 2021, the company was incorporated with an initial capital of Ch\$ 1,000,000, divided into 100 registered shares of a single series and no par value.

On December 28, 2021, it was agreed to increase the company's capital by Ch\$ 378,944,880,600 through the issuance of 37,894,488 ordinary, registered shares, of a single series and no par value, at a price of Ch\$ 10,000 per share.

On April 27, 2022, an increase in capital stock to ThCh\$ 394,097,138 was agreed, through the issuance of 1,515,126 shares. This increase was materialized on the same date with the payment made by its sole shareholder.

During November 2022, an increase in capital stock to ThCh\$ 408,142,388 is agreed, through the issuance of 1,404,525 shares. This increase was materialized on the same date with the payment made by its sole shareholder. The capital increase was formalized by deed dated January 2023.

The following capital increases were carried out during 2023:

- On January 12, 2023, 833,730 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 8,337,300,000.
- On January 30, 2023, 104,408 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 1,044,082,000.
- On February 7, 2023, 804,790 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 8,047,900,000.
- On February 28, 2023, 1,246,860 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 12,468,600,000.
- On April 18, 2023, 2,403,780 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 24,037,800,000.
- On June 7, 2023, 1,396,133 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 13,961,325,000.
- On August 14, 2023, 2,730,560 new shares were issued at par value Ch\$ 10,000 each for a total capital of Ch\$ 27,305,600,000.

c) Dividends paid and dividends delivered to shareholders

During 2025, 2024 and 2023, no dividends were paid to shareholders.

d) Earnings (losses) per share

Basic earnings per share is calculated by dividing the profit attributable to the company's shareholders by the weighted average number of common shares outstanding.

	<u>12-31-2025</u>	<u>12-31-2024</u>
	ThCh\$	ThCh\$
Loss for the year ThCh\$	(33,412,509)	(34,663,336)
Number of shares	50,334,500	50,334,500
Basic loss per share (Chilean pesos per share)	<u>(663.81)</u>	<u>(688.66)</u>

e) Other reserves

Other reserves presented in the statement of changes in equity correspond to:

Cash flow hedges. These represent the difference between the spot values and the fair value of efficiently qualifying cash flow hedge contracts (CCS), net of their deferred tax. These amounts are transferred to profit or loss as the contract matures over time.

Revaluation of PPE. This is related to the fiber optic network, which is recorded at fair value, less accumulated depreciation and impairment losses, and is revalued every 3 to 5 years (or earlier if there is a material indication of a change in fair value). Increases in fair value are recognized directly in OCI under the heading "Other reserves". Decreases are first offset against the revaluation surplus and, if they exceed the surplus, are recognized as expense in profit or loss.

	<u>12-31-2025</u>	<u>12-31-2024</u>	<u>12-31-2023</u>
	ThCh\$	ThCh\$	ThCh\$
Opening balance 01-01	178,919,911	175,991,406	(7,071,853)
Revaluation of PPE	-	-	188,513,685
Hedge reserves	(564,170)	2,928,505	(5,450,426)
Balance 12-31-2025	<u>178,355,741</u>	<u>178,919,911</u>	<u>175,991,406</u>

f) Retained earnings

The increase in accumulated losses for the closing of the 2025 and 2024 fiscal years corresponds exclusively to the results of each fiscal year, since, as stated in item (c), no dividend distributions have been made.

NOTE 21 - OPERATING REVENUE AND COSTS

The breakdown of revenue and costs of ordinary activities is as follows:

<u>Revenue</u>	<u>12-31-2025</u>	<u>12-31-2024</u>	<u>12-31-2023</u>
	ThCh\$	ThCh\$	ThCh\$
Revenue from residential services	204,841,941	188,541,388	174,314,040

Amortization of intangible assets Customer portfolio	(1,840,857)	(1,840,857)	(1,840,857)
Total	<u>(6,364,860)</u>	<u>(4,840,801)</u>	<u>(6,957,455)</u>

NOTE 23 - EXCHANGE DIFFERENCE - INCOME AND EXPENSES

a) The breakdown for the exchange rate difference of foreign currency is the following:

	Currency	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Cash and cash equivalents	USD	323,314	2,202,750	1,412,045
Trade payables	US\$-CNY-EUR	3,012,418	(5,060,890)	(2,448,888)
Financial liabilities	USD	8,464,848	(9,481,683)	(1,480,124)
Hedging derivatives	USD	(8,295,682)	7,186,637	609,003
Taxation	USD	-	(912,376)	(18,160)
Other	USD	66,674	-	(329)
Total exchange difference		<u>3,571,572</u>	<u>(6,065,562)</u>	<u>(1,926,453)</u>

b) The detail of income from indexation units is as follows:

	Currency	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Financial liabilities UF		-	139,721	-
Other	UF	1,154	-	(71,457)
Total income from indexation units		<u>1,154</u>	<u>139,721</u>	<u>(71,457)</u>

NOTE 24 - FINANCE INCOME AND COSTS

As of December 31, 2025 and 2024, Finance income consists of the following items:

	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Profit on investment in financial instruments	2,202,998	1,776,321	1,092,826
Total	<u>2,202,998</u>	<u>1,776,321</u>	<u>1,092,826</u>

As of December 31, 2025 and 2024, Finance costs consist of the following items:

	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Interest on bank borrowings	(40,026,594)	(34,890,311)	(32,199,329)
Related company loan interests	-	-	-
Leasing interests	(41,829)	(59,857)	(43,334)
Bank fees and commissions	(304,493)	(249,363)	(172,926)
Financial cost from financial instruments	(1,081,213)	(282,748)	(1,074,325)
Other financial costs	-	-	(1,250)
Financial expenses right of use (1)	(1,236,476)	(877,891)	(747,294)
Total	<u>(42,690,605)</u>	<u>(36,360,170)</u>	<u>(34,238,458)</u>

(1) Corresponds to the interests of lease contracts under IFRS 16.

NOTE 25 - OTHER INCOME AND EXPENSES BY FUNCTION

As of December 31, 2025 and 2024, Other income by function consists of the following items:

	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Sale of fixed assets	31,295	124,247	-
Sale of materials	992,207	705,394	-
Inventory difference	906,718	-	-
Debt recovery	201,105	-	777,265
Adjustments IFRS 16 previous periods	385,620	-	-
Insurance compensations	-	92,000	403,354
Other	63,514	83,271	518,613
Total	<u>2,580,459</u>	<u>1,004,912</u>	<u>1,699,232</u>

As of December 31, 2025 and 2024, Other expenses by function consist of the following items:

	12-31-2025 ThCh\$	12-31-2024 ThCh\$	12-31-2023 ThCh\$
Fines	(11,659)	(828,604)	-
Write-off inventories	(404,866)	-	-
Write-off of projects	(173,247)	(38)	(722,402)
Write-off of other debtors	(265,123)	(168,261)	(603,413)
Obsolescence provision	(906,718)	-	-
Adjustments IFRS 16 previous periods	(653,260)	-	-
Other	-	(14,863)	(462,175)
Total	<u>(2,414,873)</u>	<u>(1,011,766)</u>	<u>(1,787,990)</u>

NOTE 26 - OPERATING SEGMENTS

Definition of Segments

DB Terra Chile Holdco SpA defines and manages its activities based on business segments with distinct economic, regulatory, commercial, and operational characteristics. A segment is a component of the Group that:

- Engages in activities that generate revenues and incur costs;
- Whose results are regularly reviewed by Management (Chief Operating Decision Maker) to allocate resources and assess performance;
- For which financial information is available.

Management monitors segment results separately for resource allocation and performance decisions. Key indicators: gross profit and EBITDA. Results and assets are measured using uniform IFRS policies; inter-segment transactions not realized are eliminated. Financial liabilities centralized at Holdco Terra SpA. are not allocated to segments.

Segment Description

The Company segments its telecommunications business as follows:

- Residential (Pacífico Cable SpA): FTTH internet, HD TV, IP/mobile telephony.
- Wholesale (Holdco/Neoconex Fibra SpA): FTTO fiber leasing, corporate infrastructure; focus on B2B wholesale.

The assets and liabilities by segment for the years ended December 31, 2025 and 2024 are detailed in the following table:

	December 31, 2025				December 31, 2024			
	Residential	Wholesale	Removals	Total	Residential	Wholesale	Removals	Total
	ThCh\$	ThCh\$	ThCh\$	ThCh\$	ThCh\$	ThCh\$	ThCh\$	ThCh\$
Cash and cash equivalents	8,170,902	17,897,121	-	26,068,023	11,034,702	7,368,432	-	18,403,134
Trade and other receivables (1)	11,920,922	145,299,121	(144,114,836)	13,105,207	10,266,940	811,939	2,462	11,081,341
Property, plant and equipment	142,104,895	618,118,025	-	760,222,920	141,618,649	617,046,548	-	758,665,197
Financial liabilities (2)	3,039,959	377,501,685	-	380,541,644	4,466,282	321,508,370	-	325,974,652
Trade and other accounts payable (3)	204,473,868	18,070,737	(144,115,835)	78,428,770	173,237,242	16,471,596	(107,880,615)	81,828,223
Total current assets by segment	53,972,847	41,455,178	-	95,428,025	51,412,069	42,438,125	-	93,850,194
Total non-current assets by segment	251,997,019	1,083,223,303	(358,998,258)	976,222,064	241,129,366	935,166,566	(209,689,378)	966,606,554
								-
Total current liabilities by segment	60,388,181	46,943,094	(18,796,465)	88,534,810	78,563,406	267,779	-	78,831,185
Total non-current liabilities by segment	162,026,749	365,524,352	(125,319,370)	402,231,731	112,169,265	244,039,975	8,553,096	364,762,336

(1) Trade and Other Receivables, net, include both current and non-current portions, as well as the item "Accounts Receivable from Related Parties".

(2) Financial Liabilities include both current and non-current portions.

(3) Trade and Other Payables include both current and non-current portions, as well as the item "Accounts Payable to Related Parties".

Revenues, costs, and capital expenditures by segment for the years ended December 31, 2025 and 2024 are detailed in the following tables:

	December 31, 2025			
	Residential	Wholesale	Removals	Total
	ThCh\$	ThCh\$	ThCh\$	ThCh\$
Profit/loss:				
Revenue	228,906,882	71,949,434	(71,092,965)	229,763,351
Cost of sales	(227,835,668)	(57,580,871)	69,082,408	(216,334,131)
Gross profit	1,071,214	14,368,563	(2,010,557)	13,429,220
Profit (loss) before tax	(26,443,191)	(27,020,617)	-	(53,463,808)

Capital investment (additions)	90,104,443	31,561,435	-	121,665,878

NOTE 27 - ENVIRONMENT

Management estimates that the operation's activities should not have an impact on the environment. Therefore, as of the reporting date, no resources have been committed, nor have any payments been made resulting from non-compliance with municipal ordinances or other regulatory bodies related to these matters.

NOTE 28 - FINANCIAL RISK MANAGEMENT

The Company is constantly seeking to ensure that the risks to which it is exposed are duly measured and managed in order to minimize the effects they could have on its profits and the position of its balance sheet. Risk management is carried out by the Administration and Management.

The purchase or sale of derivative instruments for speculative purposes is not the Company's policy.

28.1) Market risk

From the point of view of DB Terra Chile Holdco SpA's operations, the Company is mainly exposed to interest rate and foreign currency exchange rate variations.

a) Interest rates

In April 2023, DB Terra Chile Holdco SpA entered into interest rate hedging contracts for the ICP rate on the peso-denominated debt that the Company maintains with four local banks (BCI, BTG Pactual, Scotia, Internacional) amounting to ThCh\$ 217,500,000,000. The purpose of these contracts was to fix the variable interest rate, resulting in a fixed average annual rate of 10.625%. On that same date, the credit agreement was amended regarding the variable interest rate, changing from a 90-day nominal TAB rate to a 90-day ICP rate. Additionally, the margin was also revised from 3.80% at that date to 4.35%.

DB Terra Chile Holdco SpA fixed the interest rate on the U.S. dollar tranche through derivative contracts on the dates of September 2022, October 2022, and August 2023, for an amount of US\$ 40,000,000. Additionally, those derivative contracts allowed the conversion of the amount of US\$ 40,000,000 into pesos.

Similarly, on August 16, 2024, three new cross currency swap (CCS) derivative contracts covering interest rate and exchange rate were signed with Scotiabank Chile to hedge U.S. dollar obligations, fixing the exchange rate at USD/CLP 950 and the "all-in interest rate" at 8.795% (outstanding debt with Goldman Sachs for USD 29,625,000), a fixed interest rate of 8.83% (new debt of USD 15,000,000 with Prival Credit), and a fixed interest rate of 8.73% (new debt of USD 10,000,000 with Bladex).

Similarly, on March 19, 2025, one new cross currency swap (CCS) derivative contract covering interest rate and exchange rate was signed with Scotiabank Chile to hedge U.S. dollar obligations, fixing the exchange rate at USD/CLP 921 and the "all-in interest rate" at 8.94% (new debt of USD 11,000,000 with Prival Credit)

Pacífico Cable SpA maintains bank debts amounting to ThCh\$ 3,000,000 at a fixed annual interest rate of 6.96%. Additionally, it maintains a loan with the parent company amounting to ThCh\$ 133,289,495 (including principal and accrued interest pending payment), at a fixed annual interest rate of 10.825%. Balances and rates at 12-31-2025

DB Terra Chile Holdco SpA holds bank debts for a capital amount of ThCh\$ 379,049,663 at an average interest rate of 10.12%. Balances and rates at 12-31-2025 Interest rates on disbursements in pesos and dollars are fixed based on derivative contracts. However, as of December 31, 2025, there are disbursements in pesos that are set at a floating (variable) ICP rate plus margin.

The potential effects on profit or loss associated with the disbursements described in the previous paragraph are as follows:

	Closing value 2025 ThCh\$	Increase 10% ICP ThCh\$	Decrease 10% ICP ThCh\$
Balances of disbursements in CLP	28,397,653	(2,839,765)	2,839,765
Total liabilities/Gain (loss) from exchange rate fluctuations	28,397,653	(2,839,765)	2,839,765

b) Exchange rates

DB Terra Chile Holdco SpA has designated the Chilean peso as its functional currency. This is due to the fact that nearly all of its revenues (originating from the loan to its subsidiary Pacifico Cable SpA and from the service contract for the fiber optic network) and costs are denominated in this currency (interest and principal payments to financial institutions). However, it incurs expenses in U.S. dollars stemming from legal and financial advisory services provided by foreign suppliers, as well as for the purchase of equipment for the maintenance of the fiber optic infrastructure network. However, the cash flows of the subsidiary company (Pacifico Cable SpA) are exposed to exchange rate risk, which is mainly related to cash flows committed in currencies other than the Chilean peso related to signal and bandwidth costs, as well as to purchases of imported equipment and supplies related to its investment plan for new customer installations. Although the Company does not have an active hedging policy for exchange rate variations, DB Terra Chile Holdco SpA favors investment in foreign currency in local banks to keep the effect of exchange rate variations on its statement of income limited. As indicated in Note 17 b), the Company maintains accounts payable balances as of December 31, 2025, denominated in U.S. dollars amounting to ThCh\$ 19,592,510, euros for ThCh\$ 4,470,836, and yuan for ThCh\$ 37,716,251 (ThCh\$ 22,164,938, ThCh\$ 3,289,987, and ThCh\$ 32,746,376 as of December 31, 2024, respectively).

The potential effects on income arising from exposure to exchange rate differentials associated with the Company's foreign currency liabilities are as follows:

	Closing value 2025 ThCh\$	Increase 10% Exchange Rate ThCh\$	Decrease 10% Exchange Rate ThCh\$
Balances of liabilities in USD	19,592,510	(1,959,251)	1,959,251
Balances of liabilities in Euros	4,470,835	(447,084)	447,084
Balances of liabilities in yuan	37,716,251	(3,771,625)	3,771,625
Total liabilities/Gain (loss) from exchange rate fluctuations	61,779,597	(6,177,960)	6,177,960

28.2) Credit risk

The Company is exposed to credit risk arising from its customers' ability to fulfill their contractual obligations. During 2025, trade receivables amounted to ThCh\$ 13,102,589 (ThCh\$ 11,078,879 in 2024), with an allowance for doubtful accounts of ThCh\$ 21,985,902 (ThCh\$ 19,167,185 in 2024).

The diversification of the portfolio (main residential segment) distributes the risk across a large number of individual customers. The Company continuously monitors payments and applies strict service suspension policies for arrears over 60 days, minimizing exposure.

The aging of trade receivables as of December 31, 2025, is detailed below:

- Not due: 89%
- 0-30 days: 3%
- 31-90 days: 2%
- >90 days: 6%

The monthly calculation model for the allowance for doubtful accounts is based on payment behavior over the last 24 months and aging delinquency rates.

The company actively manages the following actions regarding its delinquent debtors:

- Automatic service suspension for critical arrears.
- Segmented monitoring based on payment behavior.
- Judicial collection policies for high-amounts debtors

28.3) Liquidity risk

As indicated in Note 15 Other financial liabilities, during the ended year 2022, DB Terra Chile Holdco SpA took on debt with 4 Chilean banks and 2 foreign banks in order to prepay the existing loan in its subsidiary company (Pacífico Cable SpA) and to finance part of the construction of the fiber optic network, a project carried out by the latter entity. Additionally, as indicated in Note 15, during 2024 and 2025 there were increases in debt with existing banks and additional banks.

On the other hand, the Company manages its current assets and liabilities, giving priority to the timely payment of its obligations both with the financial system and with its suppliers. This management also involves ensuring compliance with its customers' payment obligations.

Similarly, the Company constantly monitors its cash flow projections and resource needs, seeking to manage in advance the necessary resources for the implementation of its growth plan and its operation in general.

28.4) Non-financial risks

The Group faces external risks that may affect its operations and results. The Company manages these risks through policies approved by the Board of Directors, monthly reviews by the Risk Committee, and strict regulatory compliance.

General Economic Risk: Chile's economic activity impacts the demand for internet and television services. If the GDP (gross domestic product) grows less than expected by the Central Bank of Chile, customer revenues could decline. Conversely, if inflation significantly exceeds expectations, it may lead to increased costs, and a sharp rise in unemployment in Chile could increase customer delinquency.

The Company currently manages this risk by indexing its contracts to the UF and CPI and diversifying its customer base between residential and business clients.

Regulatory Risks

Changes in telecommunications regulations may affect tariffs, coverage, or penalties.

- Fixed tariffs: Current decree in effect, review of company group pending.
- Public internet service (July 2024 Law): Mandatory coverage, fines multiplied by 5.
- 3.5 GHz spectrum: Approved adjustment plans.
- Removal of obsolete cables: 2026 plans, which do not apply to the Company due to the number of years since installation.
- Competition: FNE inquiries on spectrum/concentration.

The Company actively participates in public consultations with Subtel/FNE, fully complying with regulatory deadlines.

Geopolitical Risks

International tensions (Ukraine, Middle East, U.S. tariffs 2026) may increase the costs of imported equipment and cause dollar volatility.

In this regard, the Company diversifies global suppliers and maintains adequate inventory reserves to prevent disruptions in its operations.

Operational Risk

Fiber network failures or cyberattacks interrupt service, affect reputation, and incur penalties. To mitigate this, the Company monitors the network with a 24/7 security center, maintains redundant cloud backups, and has contingency plans with automatic recovery. A committee evaluates impacts monthly, prioritizes security investments, and ensures business stability.

NOTE 29 - GUARANTEES OBTAINED AND GRANTED FROM THIRD PARTIES

The Company has no guarantees taken out by third parties.

NOTE 30 - OBTAINED AND GRANTED GUARANTEES

DB Terra Chile Holdco SpA. does not maintain guarantees or restrictions, except for the guarantee bonds issued by both Pacífico Cable SpA. and DB Terra Chile Holdco SpA, which are summarized in the following table:

Bank	Currency	Amount in currency of origin	Amount CLP	Start	End
Banco de Crédito e Inversiones	CLP	1,540,525,270	1,658,818,135	02-14-2023	03-27-2030

Regarding the Credit Agreement signed on March 16, 2022 (and its 5 subsequent amendments) between DB Terra Chile Holdco SpA and eight banks (both domestic and international), we can report the following encumbrances:

- (i) First-degree non-possessory pledge over shares issued by Pacífico Cable SpA, granted by DB Terra Chile Holdco SpA. through a public deed dated March 23, 2022, at the Santiago Notary Office of Mr. Iván Torrealba Acevedo, under registry number 5.962-2022, amended by a public deed dated September 2, 2022, granted at the Santiago Notary Office of Mr. Francisco Javier Leiva Carvajal, under registry number 69,828, and registered in the Registry of Non-Possessory Pledges of the Civil Registry and Identification Service under registry number 155,588-2022.
- (ii) First-degree non-possessory pledge over shares issued by DB Terra Chile Holdco SpA., granted by DB Terra Chile Parent SpA. through a public deed dated March 23, 2022, at the Santiago Notary Office of Mr. Iván Torrealba Acevedo, under registry number 5,925-2022, amended by a public deed dated September 2, 2022, granted at the Santiago Notary Office of Mr. Francisco Javier Leiva Carvajal, under registry number 69,828, and registered in the Registry of Non-Possessory Pledges of the Civil Registry and Identification Service under registry number 155,589-2022.

NOTE 31 - CONTINGENCIES AND COMMITMENTS

The Company has ongoing legal contingencies or litigations of various natures, whose total amounts are not significant and are properly provisioned in the financial statements as of December 31, 2025.

See Note 15, section e) for details on the financial ratios required by the credit agreement in effect as of December 31, 2025.

NOTE 32 - SANCTIONS

During the period from January 1 to December 31, 2025, the Company has not been subject to significant sanctions by any authority.

NOTE 33 - SUBSEQUENT EVENTS

As of the date of issuance of these financial statements, no subsequent events have occurred that could have a material effect on the Company's equity or the interpretation of these consolidated financial statements.

NOTE 34 - APPROVAL OF THE CONSOLIDATED FINANCIAL STATEMENTS

These consolidated financial statements were approved by the Company's Management and authorized for issuance on March 9, 2026.
